Vienna, 2019-09-04 – In 2018, 2.022 million people with foreign background lived in Austria on average (23.3% of the population), by about 400 000 or 25% more than five years before (2013: 1.622 million). The share of the population with foreign background increased from 19.4% to 23.3% during these five years.

These and many more figures can be found in the Statistical Yearbook on Migration & Integration 2019, compiled by Statistics Austria (available in German only).

For more detailed information please refer to the German version.
