Information on methods, definitions: Motor vehicle statistics (registrations of new and used vehicles as well as the stock of vehicles) are secondary statistics, compiled on the basis of daily data files sent to Statistics Austria by Austria's association of insurance companies (VVO). VVO, in turn, receives data by the insurances' registrations offices, responsible for registrations, deregistrations and rectifications of motor vehicles and trailers.

Within motor vehicle statistics, all motor vehicles, once nationally or internationally registered, are levied, irrespective of the registration's duration.
