### **Number of deaths remains below level of 2020**

**Vienna**, 2021-12-02 – According to preliminary results by Statistics Austria, 2 112 people died in calendar week 46 (from 15 to 21 November 2021). The number of deaths was higher (+58 deaths) than in the previous week, but lower (-171 deaths) than in the same calendar week 2020.

"In the third week of November 2021 – before the start of the current, general and nationwide fourth lockdown – a total of 2 112 people died in Austria. This means that, for the second week in a row, around 36% more people died than in the five-year average of the same calendar week prior to the start of the Corona pandemic 2015 to 2019," says Statistics Austria Director General Tobias Thomas.

Further information on [deaths](#) can be found on our website, where an interactive web application – [the Atlas of Deaths](#) – also graphically illustrates the development and regional distribution. Detailed results can be found in Statistics Austria's [open data repository](#).
