

Press release: 13 060-088/23

Inflation increased to 9.8% in April 2023 according to flash estimate

Price increases cover more and more areas, fuels and heating oil cheaper than last year

Vienna, 2023-05-02 – The inflation rate for April 2023 is expected to be 9.8%, according to calculations by Statistics Austria as part of a flash estimate. Compared to the previous month, consumer prices rise by 0.8%.

“After 9.2% in March, inflation is expected to be 9.8% in April 2023. Numerous sectors are affected by price increases, especially services, travel and leisure. In contrast, fuels and heating oil prices are lower than a year ago”, says Statistics Austria Director General Tobias Thomas.

Consumer Price Index (CPI), April 2023

- +9.8% yearly rate of change (estimate)
- +0.8% monthly rate of change (estimate)

Harmonised Index of Consumer Prices (HICP), April 2023

- +9.6% yearly rate of change (estimate)
- +1.0% monthly rate of change (estimate)

The index level of the consumer price index and further results for April 2023 will be announced on 17 May 2023. For more information on the consumer price index, please refer to our [website](#).

Information on methodology, definitions: The flash estimates are based on the price data stock existing at the time of publication for the compilation of the consumer price index at the end of a respective reference month. Usually about 80 % to 90 % of the prices collected for the CPI can be used for the flash estimate, but without having gone through the full price statistical validation checks. Price reports received later or delayed for the reference month, as well as the corrections made in the course of the usual data compilation process, mean that the CPI flash estimates can differ from the annual and monthly rates of change of the consumer price index published in the middle of the following month (see CPI publication dates). It is not permissible to use the CPI flash estimate for contractual value adjustments or to equate it with the results of the consumer price index or the harmonised consumer price index.

Harmonised Index of Consumer Prices (HICP): Differences between the Consumer Price Index (CPI) and the EU-wide comparable Harmonized Index of Consumer Prices (HICP) are primarily based on weighting differences. While the CPI only takes into account households living in Austria, the HICP also covers expenditure by foreign tourists.
