Press release: 14 219-138/26

Inflation in Austria in June 2026 according to flash estimate at 3.2%

Significantly lower inflation in fuel prices

Vienna, 2026-07-01 – The inflation rate in June 2026 is expected to be 3.2%, according to a flash estimate by Statistics Austria. Compared to the previous month, consumer prices remained unchanged.

"According to a flash estimate, the inflation rate in June 2026 will stand at 3.2%, down from 3.7% in May. The 0.5 percentage point fall in inflation is primarily due to the fact that fuel prices, but also prices for heating oil, had a far less upward pressure than in May. As a result, overall energy prices rose by 5.4%, significantly slower than in May at +9.8%. Price pressure also eased for food, tobacco and alcohol. At +1.5%, this group saw a less sharp increase than in May, when it rose by 2.2%. Prices for industrial goods also rose at a below-average rate, increasing by 1.1%, down from 1.3% in May. However, services continue to have the greatest impact on inflation, rising by 4.4%, as in May," says Manuela Lenk, Director General Statistics at Statistics Austria.

Consumer Price Index (CPI) June 2026

- +3.2% yearly rate of change (estimate)
- ±0.0% monthly rate of change (estimate)

The flash estimate already provides insight into the rates of change of components of the consumer price index and their impact on the inflation rate. The special aggregates industrial goods (A), energy (E), food, alcohol and tobacco (F) and services (S) together sum up to the overall inflation. The special aggregates industrial goods (A) and services (S) together add up to the core inflation (see table).

Special aggregates of the National Consumer Price Index (Flash Estimate)

CPI - total index/subindex	Weight	Change to June 2025	Impact to June 2025
	in percent	+/- %	+/- percentage points
CPI – total index	**100.00**	**3.2**	**3.2**
A+S – core inflation	76.75	3.3	2.515
A– industrial goods	27.25	1.1	0.302
E – energy	8.19	5.4	0.464
F – food, tobacco, alcohol	15.06	1.5	0.222
S – services	49.50	4.4	2.214

S: STATISTICS AUSTRIA, monthly price collection.

Harmonised Index of Consumer Prices (HICP), June 2026

- +3.1% yearly rate of change (estimate)
- −0.3% monthly rate of change (estimate)

The index level of the consumer price index and further results for June 2026 will be announced on 17 July 2026. For detailed results and further information please refer to our website.

Information on methodology, definitions: The flash estimates are based on the price data stock existing at the time of publication for the compilation of the consumer price index at the end of a respective reference month. Usually, about 80% to 90% of the prices collected for the CPI can be used for the flash estimate, but without having gone through the full price statistical validation checks. Price reports received later or delayed for the reference month, as well as the corrections made in the course of the usual data compilation process, mean that the CPI flash estimates can differ from the annual and monthly rates of change of the consumer price index published in the middle of the following month (see CPI publication dates). It is not permissible to use the CPI flash estimate for contractual value adjustments or to equate it with the results of the consumer price index or the harmonised consumer price index.

Further information of the definition of the special aggregates A, E, F and S can be found on our website (available in German only).

Harmonised Index of Consumer Prices (HICP): Differences between the Consumer Price Index (CPI) and the EU-wide comparable Harmonised Index of Consumer Prices (HICP) are primarily based on weighting differences. While the CPI only takes into account households living in Austria, the HICP also covers expenditure by foreign tourists.

Statistics Austria is the central organisation for official data and statistics on society, the economy, the state and the environment in Austria. As a national statistical institute, it is committed to the statutory principles of independence, impartiality and objectivity. Statistics Austria is headed by Manuela Lenk, Director General Statistics, and Franz Haslauer, Director General Finance.
