Press release: 14 248-167/26

Construction costs in Austria in July 2026 above previous year's level

Costs in residential buildings and road construction slightly down compared to previous month

Vienna, 2026-08-14 – According to preliminary data from Statistics Austria, costs for residential and housing construction were 5.2% higher in July 2026 than in July 2025. In road construction, costs rose by 7.9% compared to July 2025, in bridge construction they grew by 6.0% and in sanitary engineering by 6.5%.

The construction cost index for **construction of residential buildings** stood at 105.5 points in July 2026. Compared to July 2025, this corresponds to an increase of 5.2% (see table 1). Compared to June 2026, costs for construction of residential buildings decreased by 0.3% (see table 2).

The index for **road construction** reached 108.3 index points (+7.9% in annual and −0.2% in a monthly comparison). The index for **bridge construction** reached 106.5 index points, which represents an increase of 6.0% compared to July 2025, while remaining unchanged compared to June 2026. The index for **sanitary engineering** was at 107.0 points (+6.5% in annual comparison, unchanged month-on-month).

Table 1: Construction cost indices, compared to previous year

Month/Year	Residential buildings		Road construction		Bridge construction		Sanitary engineering	
	Index	Compared to same month of previous year in %	Index	Compared to same month of previous year in %	Index	Compared to same month of previous year in %	Index	Compared to same month of previous year in %
July 2026[1]	105.5	5.2	108.3	7.9	106.5	6.0	107.0	6.5
June 2026[1]	105.8	5.4	108.5	8.3	106.5	6.0	107.0	6.6
May 2026	105.9	5.7	109.0	8.9	107.1	6.9	107.2	7.0
April 2026	103.9	4.4	107.3	7.9	105.0	6.0	105.2	6.3
March 2026	102.4	2.9	104.1	4.5	103.2	3.9	103.1	3.7
February 2026	101.3	2.0	100.6	0.6	100.9	1.7	100.8	1.3
January 2026	101.1	1.9	100.4	0.5	100.7	1.4	100.7	1.2
Overall Index 2025	**100.0**		**100.0**		**100.0**		**100.0**

Information on methodology:

What is the construction cost index?

Construction costs represent the costs incurred by construction companies (master builders, professionals) in the execution of construction work. The construction cost index shows the monthly change in material, energy, transportation and wage costs as well as the costs for the use of machinery that construction companies in Austria have to bear for ongoing construction projects in Austria. The index is calculated for construction of residential buildings and for the three civil engineering sectors of road, bridge and sanitary engineering.

Since January 2026, the construction cost index has been published with 2025 as the base year. Previous time series can be continued concatenated. Each index series is labelled with the base year, i.e. the average annual measure of the current construction cost index 2025 is standardised to 100.0 for the base year 2025.

What is the difference between construction costs and construction prices?

In contrast to construction costs, construction prices are the actual prices that clients have to pay to construction companies for the respective construction services. The construction output price index shows the quarterly price changes for construction services provided by companies in Austria and purchased by clients in Austria. The index thus not only provides information on the cost development of the production factors used in the construction process (such as materials and wages), but also on the change in productivity, profit margin etc. of construction companies. The index is calculated for the sectors construction of residential buildings and other structural engineering as well as road and bridge construction along with other civil engineering. Data on the construction output price index can be found on our website.

Who is Statistics Austria?

Statistics Austria is the central organisation for official data and statistics on society, the economy, the state and the environment in Austria. As a national statistical institute, it is committed to the statutory principles of independence, impartiality and objectivity. Statistics Austria is headed by Manuela Lenk, Director General Statis-tics, and Franz Haslauer, Director General Finance.
