Press release: 14 255-174/26

Industrial producer prices rose by 3.3% in July 2026 in Austria

Compared to June 2026, prices went up by 0.3%

Vienna, 2026-08-28 – According to Statistics Austria, the industrial producer price index reached 119.8 points (base year 2021) in July 2026 and was 3.3% higher than in the same month of the previous year. Thus, the upward price trend is thus continuing. In June 2026 the increase had been 3.1%, in May 2026 2.8%.

Intermediate goods up 6.6%, energy prices up 2.6% against last year's July

The 3.3% increase in producer prices in July 2026 was primarily due to price increases for intermediate goods (+6.6%). As a result, intermediate goods grew at the same rate as in the previous month (June 2026: +6.6%, May 2026: +5.7%). In July 2026, energy prices rose by an average of 2.6% compared with the same month a year earlier. In the preceding months, the year-over-year rate of change for energy was 2.1% (June 2026) and 2.8% (May 2026). Capital goods showed an average price increase of 1.1% in July 2026, following a 1.0% increase in June 2026. Prices for consumer goods fell by 0.2% compared with the same month last year (June 2026: +0.2%, May 2026: +0.1%).

Producer prices in July 2026 were 0.3% higher than in the previous month

Compared with the previous month June 2026, the producer price index increased by 0.3% overall. On a month-on-month basis, prices rose particularly sharply in manufacture of basic metals (+1.0%) and in manufacture of wood and of products of wood and cork (+0.7%). In contrast, prices fell compared to the previous month in the manufacture of chemicals and chemical products (−4.1%) and in manufacture of food products (−0.6%).

Information on methodology:

What is the industrial producer price index?

Producer prices quantify the amount that producers receive from their customers for the sale of their products. The industrial producer price index shows the average monthly price change of activities in the respective economic sector as well as the average price change of industrial products and the associated services that are manufactured or provided by companies in Austria and sold in Austria and abroad. This includes activities and products in mining and quarrying, the manufacture of goods and energy and water supply. The ex-works sales price is calculated excluding value-added tax and after deduction of all discounts granted, but including all statutory duties and taxes on the goods.

Who is Statistics Austria?

Statistics Austria is the central organisation for official data and statistics on society, the economy, the state and the environment in Austria. As a national statistical institute, it is committed to the statutory principles of independence, impartiality and objectivity. Statistics Austria is headed by Manuela Lenk, Director General Statistics, and Franz Haslauer, Director General Finance.
