List of goods codes 2026: What's New?

STATISTICS AUSTRIA
The Information Manager

Amendments to the list of goods codes in the international trade in goods statistics starting with reporting month January 2026

The list of goods codes changes yearly.

Amendments to the combined nomenclature (CN) - and therefore the list of goods codes (CN-code) - are based on the Regulation of the European Commission:

List of goods codes 2026 - Official Journal: combined nomenclature; valid from 1.1.2026 (PDF)

It is necessary to amend the list of goods codes yearly in order to take account of changes in requirements relating to statistics, to trade policy as well as technological and commercial developments. These changes have been taken into account by the European Commission while implementing the new Regulation.

These amendments lead to yearly introductions of new goods codes as well as to deletions or revisions of currently valid goods codes.

In the Regulation itself new goods codes are marked with a star (★); amendments (with significant content change) in the description of goods codes are marked with a square (■), which means that these goods codes remain unchanged while their description have been modified.

There also might be changes with regard to supplementary units.

The Regulation enters into force on 01 January 2026 and is valid for the whole reporting year 2026.

The allocation of goods to an individual goods code must always be made according to their specific nature.

Deletions or introductions of goods codes could also indicate changes of their respective subheadings (CN2-, CN4- and CN6-codes).

The following tables are just indicative - they serve as an aid for the allocation of goods to goods codes.

1. Comparison: goods codes 2025 to goods codes 2026 (transposition list)
2. Amendments: supplementary unit; *valid* from 1.1.2026
3. Amendments: goods codes remain unchanged while the description has been modified as of 1.1.2026 (reused)
4. Deletion: goods codes which are *invalid* from 1.1.2026
5. Introduction: new goods codes which are *valid* from 1.1.2026
6. Description Change: Goods codes with an updated description
7. Comparison: goods codes 2025 to goods codes 2026 (transposition list) with description

Please don't forget to implement all relevant amendments on time.

The current reporting deadlines (Einsendetermine) and questions regarding the allocation of goods to goods codes (Warennummernauskunft) can be found in the INTRASTAT-Guidelines:

INTRASTAT-Guidelines

Further service documents are available on our website (partly available in English):

Foreign trade (INTRASTAT) - STATISTICS AUSTRIA - The Information Manager

Overall remarks on the tables

Column A contains the goods codes from the previous year. These are either reused (table 3) or cancelled goods codes (table 4). Column C contains the goods codes from the current year, which are either reused (table 3) or new goods codes (table 5).

The addition "ex" in column B means that a goods code in the current year comes partly from the goods code of the previous year. At least one additional goods code of the previous year is included in the conversion.

New goods codes are marked with an asterisk (★) in column D (or E in table 6). Reused goods codes, in which the content of the goods code changed significantly, are marked with a square (■). In the case of a goods code, in which the content of the goods code changed only slightly, the field in column D (or E in table 6) remains empty ( ). Content change means that the assignment of products/articles to a currently valid goods code has changed compared to the previous year. Pure text changes to a goods code, i.e. only the descriptive text of the goods code changed, are not listed in this document.

The column "Supplementary unit" always refers to the goods codes of the current year.

Some new goods codes (table 5) cannot be assigned to goods codes from the previous year in the comparison tables and are therefore not listed.

With the annual amendments of goods codes, several situations can arise, which are shown below as examples with fictitious goods codes.

1 to 1 correspondence

A single goods code from the previous year is replaced by exactly one new (★) goods code in the current year.

Goods code previous year		Goods code current year		Supplementary unit
8888 00 01	-	8888 00 02	★	-

The goods code 8888 00 01 from the previous year is replaced by the new goods code 8888 00 02 (★) in the current year.

1 to m correspondence

A single goods code from the previous year merges into several goods codes in the current year. The assignment can be made to reused (■) ( ) and/or new (★) goods codes.

Assignment to new (★) and reused (■) ( ) goods codes

Goods code previous year		Goods code current year		Supplementary unit
9000 00 01	-	9000 00 01	■	-
	-	9000 00 02	★	-

If the change of the content of the goods code 9000 00 01 wouldn't be significant, the field in column D would be unmarked ( ):

Goods code previous year		Goods code current year		Supplementary unit
9000 00 01	-	9000 00 01		-
	-	9000 00 02	★	-

Assignment to new (★) goods codes

Goods code previous year		Goods code current year		Supplementary unit
9000 00 01	-	9000 00 02	★	-
	-	9000 00 03	★	-

The goods code 9000 00 01 from the previous year is no longer valid in the current year and merges into the new goods codes 9000 00 02 (★) and 9000 00 03 (★) in the current year.

n to 1 correspondence

Several goods codes from the previous year are replaced by exactly one new (★) goods code in the current year.

Goods code previous year		Goods code current year		Supplementary unit
8888 00 02	ex	8888 00 01	★	-
8888 00 03	ex	8888 00 01	★	-

For the new goods code 8800 00 01 (★), the goods codes of the previous year 8888 00 02 and 8800 00 03 are used for the conversion.

n to m correspondence

Multiple goods codes from the previous year merge into multiple goods codes in the current year. The assignment can be made to reused (■) ( ) and/or to new (★) goods codes.

Goods code previous year		Goods code current year		Supplementary unit
9200 00 01	ex	9200 00 03	★	-
	ex	9200 00 04	★	-
9200 00 02	-	9200 00 02	■	-
	ex	9200 00 03	★	-
	ex	9200 00 04	★	-

For the new goods codes 9200 00 03 (★) and 9200 00 04 (★), the goods codes of the previous year 9000 00 01 and 9200 00 02 are used for the conversion. The goods codes 9200 00 02 (■) from the previous year also remains valid in the current year, but the content of this goods code has changed and has partly been transferred to the new goods codes 9200 00 03 (★) and 9200 00 04 (★).

In the RTIC reporting tool, the "Blaue KN" is a technical aid that is intended to help you with the annual amendments of goods codes when submitting the Intrastat declaration. A detailed description of the "Blue KN" can be found in the RTIC Help.

RTIC Help

1. Comparison: goods codes 2025 to goods codes 2026 (transposition list)

Ex: means that the content of the goods code for the year 2026 comes partly from the goods code of the previous year. At least one additional goods code of 2025 is included in the conversion.

The allocation of goods to an individual goods code must always be made according to their specific nature.

For a more detailed version with additional descriptions see Table 6: *Comparison: goods codes 2025 to goods codes 2026 (transposition list) with description*

List of goods codes 2026 - Official Journal: combined nomenclature; valid from 1.1.2026 (PDF)

3. Amendments: goods codes remain unchanged while the description has been modified as of 1.1.2026 (reused)

There are no reused commodity codes this year

The goods codes listed here are valid in 2026, but the goods codes from 2025 have been split into further goods codes (see Table 1 or Table 6), or the content has changed.

4. Deletion: goods codes, *invalid* from 1.1.2026

Goods codes

In the official journal new goods codes are marked with a star (★).

List of goods codes 2026 - Official Journal: combined nomenclature; valid from 1.1.2026 (PDF)

6. Description Change

The description of these Goods Codes has been updated from the year 2025 to the year 2026.
The Goods Codes remain the same

Goods codes	Descritpion 2025	Description 2026
8708 29 90	Parts and accessories for the industrial assembly of bodies of: tractors, motor vehicles for the transport of >= 10 persons, motor cars and vehicles principally designed for the transport of persons, motor vehicles for the transport of goods, special purpose motor vehicles (excl. bumpers and parts thereof, safety seat belts, front windscreens "windshields", rear windows and other windows and parts and accessories for the industrial assembly of motor vehicles of subheading 8708.29.10)	Parts and accessories of bodies of: tractors, motor vehicles for the transport of >= 10 persons, motor cars and vehicles principally designed for the transport of persons, motor vehicles for the transport of goods, special purpose motor vehicles (excl. for the industrial assembly of: bumpers and parts thereof, safety seat belts, front windscreens "windshields", rear windows and other windows and parts and accessories for the industrial assembly of motor vehicles of subheading 8708.29.10).

7. Comparison: goods codes 2025 to goods codes 2026 (transposition list) with description

Ex: means that the content of the code for the year 2026 comes partly from the code of the previous year. At least one additional goods code of 2025 is included in the conversion.

The allocation of goods to an individual goods code must always be made according to their specific nature.

Goods codes 2025		Goods codes 2026	Description 2026		Supplementary unit 2026
2841 90 85	-	2841 90 40	Lithium nickel manganese cobalt oxides	★	-
	-	2841 90 70	Salts of oxometallic or peroxometallic acids (excl. chromates, dichromates, peroxochromates, manganites, manganates, permanganates, molybdates, tungstates "wolframates", zincates, vanadates and lithium nickel manganese cobalt oxides)	★	-
2842 90 80	-	2842 90 20	Lithium iron phosphate	★	-
	-	2842 90 70	Salts of inorganic acids or peroxoacids, n.e.s.	★	-
2909 30 38	-	2909 30 37	Decabromodiphenyl ether	★	-
	-	2909 30 39	Brominated derivatives of aromatic ethers (excl. pentabromodiphenyl ether, decabromodiphenyl ether, 1,2,4,5-tetrabromo-3,6-bis"pentabromophenoxy"benzene and 1,2-bis"2,4,6-tribromophenoxy"ethane for the manufacture of acrylonitrile-butadiene-styrene [ABS])	★	-
2915 90 70	-	2915 90 15	Perfluorooctanoic acids and their salts	★	-
	-	2915 90 90	Saturated acyclic monocarboxylic acids, their anhydrides, halides, peroxides and peroxyacids; their halogenated, sulphonated, nitrated or nitrosated derivatives (excl. formic acid and acetic acid, mono-, di- or trichloroacetic acids, propionic acid, butanoic and pentanoic acids, palmitic, stearic and lauric acids and their salts and esters, acetic anhydride, and perfluorooctanoic acids and their salts)	★	-
3801 10 00	-	3801 10 10	Artificial graphite powders containing <=0,05 % of ash by weight	★	-
	-	3801 10 90	Artificial graphite (excl. retort graphite, retort carbon, goods of artificial graphite, incl. refractory materials based on artificial graphite, and powders containing <=0,05 % of ash by weight)	★	-
3818 00 10	-	3818 00 11	Doped silicon wafers of a thickness <=200mikrom, rectangular, whether or not with cut or rounded corners "photovoltaic wafers"	★	-
	-	3818 00 19	Silicon doped for use in electronics, in the form of discs, wafers, cylinders, rods or similar forms, whether or not polished or with a uniform epitaxial coating (excl. elements that have been further processed, e.g. by selective diffusion, and "photovoltaic" rectangular wafers of a thickness <=200mikrom)	★	-
7308 20 00	-	7308 20 10	Tubular wind turbine steel towers and tower-sections	★	-
	-	7308 20 90	Towers and lattice masts, of iron or steel (excl. tubular wind turbine steel towers and tower-sections)	★	-
8410 90 00	-	8410 90 10	Rotors of hydraulic turbines and water wheels	★	-
	-	8410 90 20	Stators of hydraulic turbines and water wheels	★	-
	-	8410 90 90	Parts of hydraulic turbines and water wheels incl. regulators (excl. rotors and stators)	★	-
8412 90 80	-	8412 90 60	Wind turbine blades	★	-
	-	8412 90 70	Parts of non-electrical engines and motors, n.e.s.	★	-
8501 33 00	-	8501 33 10	Hydrogen fuel cell DC generators of an output > 75 kW but <= 375 kW	★	p/st
	-	8501 33 90	DC motors and DC generators of an output > 75 kW but <= 375 kW (excl. photovoltaic and hydrogen fuel cell generators)	★	p/st
8504 40 85	ex	8504 40 84	Inverters with maximum power point tracking functionality	★	p/st
	ex	8504 40 87	Inverters without maximum power point tracking functionality	★	-
8504 40 86	ex	8504 40 84	Inverters with maximum power point tracking functionality	★	p/st
	ex	8504 40 87	Inverters without maximum power point tracking functionality	★	-
8507 90 30	-	8507 90 31	Separators for electric accumulators, of plastic film of a thickness <=40 mikrom	★	-
	-	8507 90 39	Separators for electric accumulators (excl. separators of vulcanised rubber other than hard rubber or of textiles, and separators of plastic film of a thickness <=40 mikrom)	★	-
8543 90 00	-	8543 90 10	Assemblies of stacked galvanic cells for water electrolysis machines for the production of hydrogen or oxygen	★	-
	-	8543 90 90	Parts of electrical machines and apparatus, having individual functions, n.e.s. in chapter 85	★	-
