List of goods codes 2026

CN2- to CN8-codes with description

The list of goods codes

Amendments to the combined nomenclature (CN) - and therefore the list of goods codes (CN-code) - are based on the Regulation of the European Commission:

List of goods codes 2026 - Official Journal: combined nomenclature; valid from 1.1.2026 (PDF)

It is necessary to amend the list of goods codes yearly in order to take account of changes in requirements relating to statistics, to trade policy as well as technological and commercial developments. These changes have been taken into account by the European Commission while implementing the new Regulation.

These amendments lead to yearly introductions of new goods codes as well as to deletions or revisions of currently valid goods codes.

In the Regulation itself new goods codes are marked with a star (★); amendments (with significant content change) in the description of goods codes are marked with a square (■), which means that these goods codes remain unchanged while their description have been modified.

There also might be changes with regard to supplementary units.

The Regulation enters into force on 01 January 2026 and is valid for the whole reporting year 2026.

The allocation of goods to an individual goods code must always be made according to their specific nature.

Deletions or introductions of goods codes could also indicate changes of their respective subheadings (CN2-, CN4- and CN6-codes).

4-digit or 6-digit CN codes which are marked with an asterisk (*) only have one related CN8 code (e.g.: 010121 *Pure-bred breeding horses), which will automatically be used for the field “CN8 code” (01012100)

The current reporting deadlines (Einsendetermine) and questions regarding the allocation of goods to goods codes (Warennummernauskunft) can be found in the INTRASTAT-Guidelines:
