

Help and guidance

How do I log in?

Log in at www.statistik.at/onlinebefragung with your username and password. You can find these in your invitation letter.

The login data on the front of the letter is valid for everyone in your household.

Then enter or check your household data.

This will only take five minutes.

Who should complete the household questionnaire?

The person who knows most about the household should complete the household questionnaire. In this questionnaire, we ask about things like housing costs and energy sources.

Who should complete the individual questionnaire?

Everyone in the household aged 16 and over should complete their own individual questionnaire.

Who should complete the children's questionnaire?

Children up to the age of 15 do not complete the questionnaire themselves. This should be done by the person in the household who knows most about the children.

The children's questionnaire is much shorter than the questionnaire for adults.

Pause

What does the 'Pause' button mean?

By clicking on 'Pause', you can take a break from the questionnaire and come back to it later at any time.

What does the blue text below the question mean?

Click on the blue text if you need help answering a question. You will then see an explanation.
