

What's it about?

What is PIAAC?

PIAAC is an **international study** of everyday **adult skills**. Over 30 countries are taking part, including Austria. Statistics Austria is implementing PIAAC in Austria.

We're asking YOU!

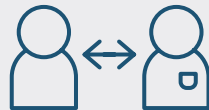

You were selected to take part in PIAAC at random from the entire population of Austria. Your participation is important because you are **essential** for this project.

How does it work?

An official from Statistics Austria will come to interview you at a previously agreed time. First of all you will answer a few questions and then work independently on tasks from various areas of everyday life.

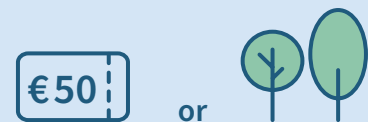

No previous knowledge required!

Your participation is rewarded:

After the survey you will receive a 50 Euro shopping voucher.

Or: Statistics Austria will donate 50 Euro to an Austrian **nature conservation project**. You decide!

By taking part, you will be helping to obtain meaningful results on the everyday skills of adults in Austria.

Arrange an appointment and take part!
