

Statistical grids Data and Fees

Population Stock
Buildings and Dwellings Register
Register-Based Labour Market Statistics

Census 2011/2021 (and 2001)
Population census
Buildings and Dwellings Census
Census of Enterprises and their Local Units of Employment

Fees for internal, non-commercial use

(as of January 2024)

Data Packages

Data is offered in package, but also single characteristics can be ordered. The region of the requested data can be chosen without restrictions, for the delineation a 1km grid size is used. The fees are published for the whole national territory of Austria. More details on the available characteristics can be found in the metadata catalogue *reg.data* under <http://www.statistik.at/reg-datenkatalog/>.

Packages derived from Registers

Package A – Register-Objects

Objects from the Population Stock and the Buildings and Dwellings Register

State of data: yearly updates with date as of 1 January.

Objects: Number of buildings (1), Number of dwellings (1), Number of persons with secondary residence (1), Number of residential buildings (1), Resident population (number of persons with main residence) (1)

Package Population

Characteristics from the Population Stock

State of data: yearly updates with date as of 1 January

Objects: Resident population (number of persons with main residence) (1)

Characteristic: Resident population by age groups and sex (22), Resident population by citizenship (18), Resident population by country of birth (18), Resident population by country of origin (18)

Package Buildings and Dwellings Register

Characteristics from the Buildings and Dwellings Register

State of data: yearly updates with date as of 1 January

Objects: Number of buildings (1), Number of buildings with dwellings (1), Number of dwellings (1), Number of residential buildings (1), Number of usage units (1)

Characteristic: Buildings by building use (12), Buildings by construction period (13), Buildings by gross area (9), Buildings by residential use and number of dwellings (16), Buildings by type of residence (4), Dwellings by floor space (9), Dwellings by number of rooms (7), Residential buildings with 1 dwelling by floor space (6), Residential buildings with 2 dwellings by floor space (6), Residential buildings with 3 or more dwellings by floor space (6)

Packages derived from the Register-based Labour Market Statistics (RbLMS)

Package RbLMS-Objects

State of data: yearly updates with date as of 31 October (available appr. 21 months later).

Description: Objects from the packages of the Register-based Labour Market Statistics

Objects: Objects: Number of commuters at place of residence (1), Number of commuters at place of work or educational institution (1), Number of daytime population (1), Number of families (1), Number of households (1), Resident population (number of persons with main residence) (1)

Package RbLMS Demography and Employment

Characteristics from the Register-Based Labour Market Statistics

State of data: yearly updates with date as of 31 October (available est. 24 month later).

Objects: Resident population (number of persons with main residence) (1)

Characteristic: Population by current activity status and sex (12), Population by economic activity (OENACE 2008) of the local unit and Sex (46), Population by legal marital status (4), Population by status in employment and Sex (12), Resident population by age groups and sex (42), Resident population by citizenship (14), Resident population by country of birth (14)

Package RbLMS Education

Characteristics from the Register-Based Labour Market Statistics

State of data: yearly updates with date as of 31 October (available est. 24 month later).

Objects: Resident population (number of persons with main residence) (1)
Characteristic: Population 15 years and over (1), Population by field of education (attainment) (13), Population by participation in formal education (15), Population: educational attainment - highest completed level (9)

Package RbLMS Households

Characteristics from the Register-Based Labour Market Statistics

State of data: yearly updates with date as of 31 October (available est. 24 month later).

Objects: Number of households (1)

Characteristic: Household reference person in private households by age and sex (12), Household reference person in private households by citizenship (6), Household reference person in private households by country of birth (6), Household reference person in private households by current activity status (6), Household reference person in private households by highest completed level of education (4), Household reference person in private households by legal marital status (4), Household reference person in private households by status in employment (4), Number of private households with persons 65 years and older (1), Number of private households with persons under 15 years (1), Number of private households with persons under 18 years (1), Size of private household (4), Type of household (8)

Package RbLMS Families

Characteristics from the Register-Based Labour Market Statistics

State of data: yearly updates with date as of 31 October (available est. 24 month later).

Objects: Number of families (1)

- Characteristic: Families by size of family nucleus (3), Families by type of family nucleus (6), Number of families with children under 15 years (1), Number of families with children under 18 years (1), Number of families with children under 25 years (1), Number of families with children under 6 years (1)

Package RbLMS Daytime Population

Description: Objects and Characteristics from the Register-Based Labour Market Statistics - Daytime Population

State of data: yearly updates with date as of 31 October (available est. 24 month later).

Objects: Daytime population

Characteristics: Daytime population by type, Daytime population by age groups and sex, Daytime population by citizenship

Package RbLMS Commuters

State of data: yearly updates with date as of 31 October (available appr. 21 months later).

Description: Objects and Characteristics from the Register-based Labour Market Statistics - Commuters

Objects: Number of commuters at place of residence, Number of commuters at place of work or educational institution, Number of economically active commuters at place of residence, Number of economically active commuters at place of work, Number of commuting pupils/students at place of residence, Number of commuting pupils/students at place of educational institution

Characteristics: Economically active commuters at place of residence by distance (km) (10), Economically active commuters at place of residence by minutes (10), Economically active commuters at place of work by distance (km) (9), Economically active commuters at place of work by minutes (9), Commuting pupils/students at place of residence by participation in formal education (12), Commuting pupils/students at place of residence by distance (km) (10), Commuting pupils/students at place of residence by minutes (10), Commuting pupils/students at place of educational institution by participation in formal education (12), Commuting pupils/students at place of educational institution by distance (km) (9), Commuting pupils/students at place of educational institution by minutes (9)

RbLMS-Grid based Commuting Matrix

State of data: yearly updates with date as of 31 October (available appr. 21 months later).

Description: "From"- "To" Commuting relations from the Register-based Labour Market Statistics

The commuting matrix contains the "from" (place of residence) and "where" (place of work / school) on the basis of grids for the economically active commuters and commuting pupils/students respectively. It is offered for grid sizes 250m, 500m and 1km.

The commuting matrix on the basis of grids can also be obtained for a specific region only (project area). In order to keep all commuting relations for commuters from or into the project area within Austria, the matrix for this excerpt is created individually for the customers. Within the project area, it contains the commuting matrix on the basis of grids, and for commuters who commute into the project area or commute out of the project area it contains the relationship municipality to grid and grid to municipality respectively. The price for the matrix for a project area is determined individually (no update price).

Packages 2011/2021 Census

Package Register-Objects

State of data: 31 October 2011, 31 October 2021

Objects: Number of buildings (1), Number of daytime population (1), Number of dwellings (1), Number of employees (1), Number of households (1), Number of local units of employment (workplaces) (1), Number of persons with secondary residence (1), Number of residential buildings (1), Resident population (number of persons with main residence) (1)

Package Workplace (LUE)

State of data: 31 October 2011, 31 October 2021

Objects: Number of employees (1), Number of local units of employment (workplaces) (1)

Characteristic: Employed persons at place of the local unit by NACE-Classification (Rev. 2) and sex (42), Employees at place of the local unit by country of main residence (7), Employees at place of the local unit by occupational status and sex (8), Local unit by legal form of the enterprise (11), Local unit by NACE-Classification (Rev. 2) (21), Local unit by number of employed persons (11), Local unit by number of self-employed persons (4), Local unit by total number of employees (11), Self-employed persons at place of the local unit by NACE-Classification (Rev. 2) and sex (42)

Package Buildings and Dwellings

State of data: 31 October 2011, 31 October 2021

Objects: Number of buildings (1), Number of buildings with dwellings (1), Number of dwellings (1), Number of residential buildings (1)

Characteristic: Buildings by net building area in square meters (5), Buildings by number of floors above ground (7), Buildings by occupancy status (2), Buildings by period of construction (9), Buildings by type of ownership (4), Dwellings by number of rooms (4), Dwellings by number of usually resident persons (5), Dwellings by occupancy status (2), Dwellings by useful floor space in square meters (5), Number of conventional dwellings in the building (7), Type of building (predominant use) (10)

Package Demography and Employment

State of data: 31 October 2011, 31 October 2021

Objects: Resident population (number of persons with main residence) (1)

Characteristic: Population by current activity status and sex (12), Population by economic activity (OENACE 2008) of the local unit and Sex (46), Population by legal marital status (4), Population by status in employment and Sex (12), Resident population by age groups and sex (42), Resident population by citizenship (14), Resident population by country of birth (14)

Package Education

State of data: 31 October 2011, 31 October 2021

Objects: Resident population (number of persons with main residence) (1)

Characteristic: Population 15 years and over (1), Population by field of education (attainment) (13), Population by participation in formal education (15), Population: educational attainment - highest completed level (9)

Package Households

State of data: 31 October 2011, 31 October 2021

Objects: Number of households (1)

Characteristic: Household reference person in private households by age and sex (12), Household reference person in private households by citizenship (6), Household reference person in private households by country of birth (6), Household reference person in private households by current activity status (6), Household reference person in private households by highest completed level of education (4), Household reference person in private households by legal marital status (4), Household reference person in private households by status in employment (4), Number of private households with persons 65 years and older (1), Number of private households with persons under 15 years (1), Number of private households with persons under 18 years (1), Size of private household (4), Type of household (8)

Package Families

State of data: 31 October 2011, 31 October 2021

Objects: Number of families (1)

Characteristic: Families by size of family nucleus (3), Families by type of family nucleus (6), Number of families with children under 15 years (1), Number of families with children under 18 years (1), Number of families with children under 25 years (1), Number of families with children under 6 years (1)

Packages from the Census 2001

Following Packages are also available from the Census 2001 as of 15.5.2001. For more information please contact geoinformation@statistik.gv.at.

Standard package A – objects from the 2001 Censuses

Standard package B – characteristics from the 2001 Population Census

Standard package C – characteristics from the 2001 Building and Dwelling Census

Standard package D – characteristics from the 2001 Census of Enterprises and their Local Units of Employment

Standard packages E – dwelling characteristics (heating and fuel) from the 2001 Building and Dwelling Census

Fees for internal, non-commercial use in €

A fixed basic amount of €327,- will be charged per order to cover consultancy, processing and billing costs. Selected data (packages) in grid size 10km are available for free.

Fees for one Object/Characteristics	100m	250m	500m	1.000m	2.000m	5km

Confidentiality / Data Protection

The absolute counts (objects) of the respective units are provided to the customer without suppression, even for the smallest grid sizes. However, if the grid cells are not sufficiently populated the characteristics for the units are suppressed. The data protection threshold depends on the type of the unit.

Data with creation date **before 31 October 2011**:

- **Objects:** without restrictions
- **Population data:** characteristics relating to the resident population or households are released only if at least 31 persons with main residence (resident population) are registered in the grid cell.
- **Buildings and Dwellings data:** characteristics relating to buildings or dwellings are released only if at least four buildings resp. four dwellings are registered in one grid cell.

Data with creation date **starting at 31 October 2011**:

- **Objects:** without restrictions (number of persons with main residence, number of persons with secondary residence, number of daytime population, number of buildings, number of residential buildings, number of dwellings, number of usage units, number of buildings with dwellings, number of local units of employment (workplaces), number of employees, number of commuters at place of work place or educational institution, number of commuters at place of residence, number of households)
- **Population data:** characteristics relating to the resident population (demography, employment and education) are released only if at least 4 persons with main residence are registered in the grid cell.
- **Household data:** characteristics relating to the households or household representatives are released only if at least 4 households are registered in the grid cell.
- **Family data:** characteristics relating to families are released only if at least 4 families are registered in the grid cell.
- **Buildings:** characteristics relating to buildings are released only if at least three buildings or three dwellings are registered in one grid cell.
- **Dwellings:** characteristics relating to dwellings are released only if at least three dwellings are registered in one grid cell.
- **Commuters at place of residence:** characteristics relating to commuters are released only if at least 4 commuters at place of residence are registered in the grid cell.
- **Commuters at place of work place or educational institution:** characteristics relating to commuters are released only if at least 4 in-commuters are registered in the grid cell.
- **Local Units of Employment (workplaces):** characteristics relating to LUE are released only if at least 3 local units of employment are registered in the grid cell.
- **Employees:** characteristics relating to employees are released only if at least 4 employees are registered in the grid cell.
- **Daytime population:** characteristics relating to Daytime population are released only if at least 4 daytime-persons are registered in the grid cell.

Terms of use

For the use of data on the basis of regional statistical grid units, Statistics Austria differentiates between internal use, commercial use excluding resale and commercial use including resale. When acquiring the data, the customer must sign the relevant terms of use. The data may only be used within the scope of the agreed use.
https://www.statistik.at/atlas/reg-datenkatalog/data/terms_of_use_20220401.pdf

Further Information

The geodata of the statistical grids (excluding attribute data) are available for free on the internet

http://data.statistik.gv.at/web/meta.jsp?dataset=OGDEXT_RASTER_1

Further information on grids can be found at:

<https://www.statistik.at/en/services/tools/services/regional-information>
