- ✓ Suitable for files of any size
- ✓ Transparency thanks to download confirmations
- ✓ Supported browsers: Google Chrome*, Microsoft Edge*, Safari*
- ✓ Optimized use for all end devices: whether desktop, tablet or smartphone (≥ 360 x 640 px)

*The most recent version.

Secure transfer to external persons

Four steps to secure sending

1. Create new transfer

Click on *"New Delivery"* and enter the recipient, the subject and your message.

2. Add attachments

Attach files to your delivery using drag & drop or the *"Add files"* button.

3. Security level & Validity period

Specify the security level at which your transfer should be sent and how long your attachments will be available for the recipient to download.

Please note: These settings may already be preset by the administrator!

4. Sending with FTAPI

Click *"Send Now"* and your transfer will be securely transmitted.
