What is STATcube?

STATcube is the statistical database system of Statistics Austria and it's available online www.statcube.at. This contemporary product is characterised by user-friendly interface. The evaluation and analysis as well as the creation of data can be carried out online followed by data output in various formats.

What is a data cube?

Data cube is a term frequently used for the description of data in logical structure. Data will be arranged as elements of a multi-dimensional cube. The dimensions within a cube connect the data and provide easy access by different points of view.

Which data is provided in STATcube?

STATcube contains the full range of data offered by Statistics Austria with following contents:

- Labour market
- Population and society
- Energy and environment
- Research, innovation, digitalisation
- Industry, construction, trade and services
- International trade
- Agriculture and forestry
- Tourism and transport
- National economy and public finance
- Wirtschaftsatlas
- Economic monitor

Examples for possible questions

The following questions are taken from the division Population, National accounts, Prices, Tourism, Imports and exports of goods (required data cube is given in brackets):

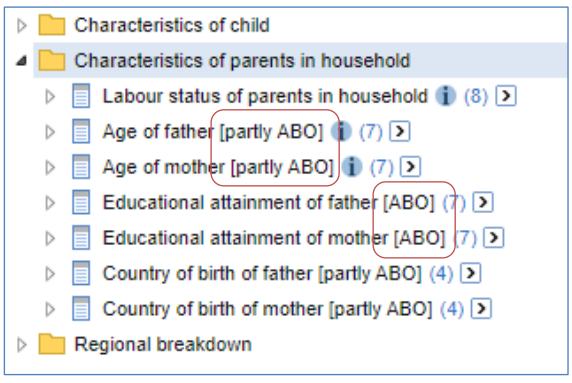
- How has the number of 75 years old women developed in the district of Mattersburg since 2012? **(Population/Population stock and population change /Population at the beginning of the year since 1982**)
- People born in South America are living in which Austrian federal state mostly? **(Population/ Population stock and population change /Population at the beginning of the year since 1982)**
- The most caesarean sections have been carried out in which Austrian federal state? **(Population/Births/Births)**

- How many marriages has been concluded 1980 in Austria, where the wife has been ten years older than her husband? **(Population/Marriages, divorces, registered partnerships/Marriages and establishment of registered partnerships)**
- In which Austrian federal state is the gross regional product of 2013 nominally the highest? (**National Accounts/Regional Accounts/Gross regional product by ESA 2010 (NUTS2+NUTS3**)
- During the last two years what about the development of consumer prices for books, fruits or rentals for housing? **(Prices/Consumer Price Index (CPI/HICP)/02-CPI inflation rates, base 2015)**
- How many people from Finland has been on holiday in Carinthia last year? (**Tourism/Accomodation statistics as of 1974 according to calendar year)**
- In the year 1975 has there been more overnight stays in winter season or in summer season in Tyrol? **Tourism/Accomodation statistics as of 1974 according to seasons)**
- During the current year what's the value of the Austrian exports to Germany and the value of the Austrian imports from the United States? **(Foreign Trade/Foreign Trade; Absolute Data/Foreign trade as of 2007 by 2-digit CN)**

Benefits of STATcube subscription

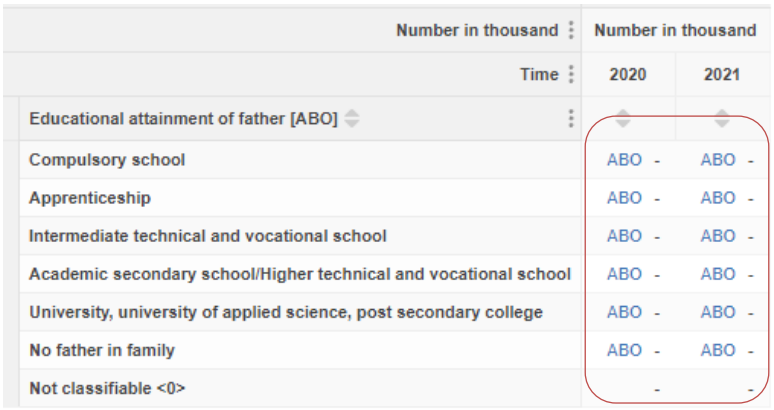
A subscription provides access to more detailed data and additional features not available with the free guest access. As a subscriber, you are also able to store queries on your own probably for a later reuse.

Guest access can be used to consider whether the purchase of a STATcube subscription would be appropriate for your needs. The database includes features which can only be fully accessed by subscribers. Concerned features are labelled with the tag [partly ABO]. Features which are exclusively accessible to subscribers are labelled with the tag [ABO]. See figure below.



Please note: the abbreviation "ABO" stand for the German translation of the term "subscription" (German: Abonnement).

In the role of a guest user the tag “ABO” only appears for such cases where values will be actually available within the selected combinations (see figure below).



Number in thousand	Number in thousand	
Time	2020	2021
Educational attainment of father [ABO]		
Compulsory school	ABO -	ABO -
Apprenticeship	ABO -	ABO -
Intermediate technical and vocational school	ABO -	ABO -
Academic secondary school/Higher technical and vocational school	ABO -	ABO -
University, university of applied science, post secondary college	ABO -	ABO -
No father in family	ABO -	ABO -
Not classifiable <0>	-	-

STATcube subscription: types and costs

You can choose between four different types of subscription:

STATcube subscription for 14 days

Validity 14 days (starting with the day of activation) and 100 000 values

Price: € 57.-

STATcube subscription for 92 days (3 months)

Validity 92 days (starting with the day of activation) and 1.5 million values

Price: € 282.-

STATcube subscription for 366 days (1 year)

Validity 366 days (starting with the day of activation) and 6 million values

Price: € 901.-

STATcube subscription for 1 098 days (3 years)

Validity 1 098 days (starting with the day of activation) and 18 million values

Price: € 2 701.-

STATcube subscription: order and payment

The order form for STATcube subscriptions can be found on our website under the point Subscription access and the subitem Order / renewal. The guide for the current order process and the associated one-time registration is also available under this point: 4 easy steps to subscribe (PDF).

The offered means of payment are: credit card (card payment) or bank transfer (direct debit). Payment by direct debit is only possible if you own an account at an Austrian bank and you have to use the German-language order form.

Activation und validity

After purchase of a STATcube subscription you will receive the activation code per e-mail. A subscription can be activated by entering the activation code in the login page. The term of the subscription starts with activation and ends automatically upon expiry. A subscription must be activated within 367 days following acquisition.

During the period of validity STATcube access can be repeated as often as required. The type of subscription determines terms and conditions of use (temporal and quantative contingent).

The STATcube initial screen will keep you informed in detail about the current state of validity and consumption (in percent of your contingent). An e-mail reminder will inform you before your subscription expires. The validity of your STATcube subscription is additionally displayed on STATcube initial screen within column “validity”.

Renewal of STATcube subscription

STATcube subscriptions end automatically upon expiry and there is no automatic renewal. An e-mail reminder will inform you early enough about the coming end of your current STATcube subscription to ensure purchase and activation of a new STATcube subscription on time.

Residual data volume at the time of expiration of the STATcube subscription

If you would like to renewal you have to purchase a new STATcube subscription for the requested period. In this case please pay special attention to the time of activation:

- If you activate the newly purchased subscription during the current period of the still active subscription accumulation is carried out with regard to data volume but not with regard to duration.
- If you activate the newly purchased subscription after the previous subscription has expired the residual data volume of the expired subscription will lapse.

Further information

On our website you would find additional information as well as numerous assistance under the point STATcube – statistical database. The range offers following points and subitems which are constantly adjusted to meet the last customer requirements:

Free access	Subscription access	Legal points	Help
