4 Easy steps to subscribe

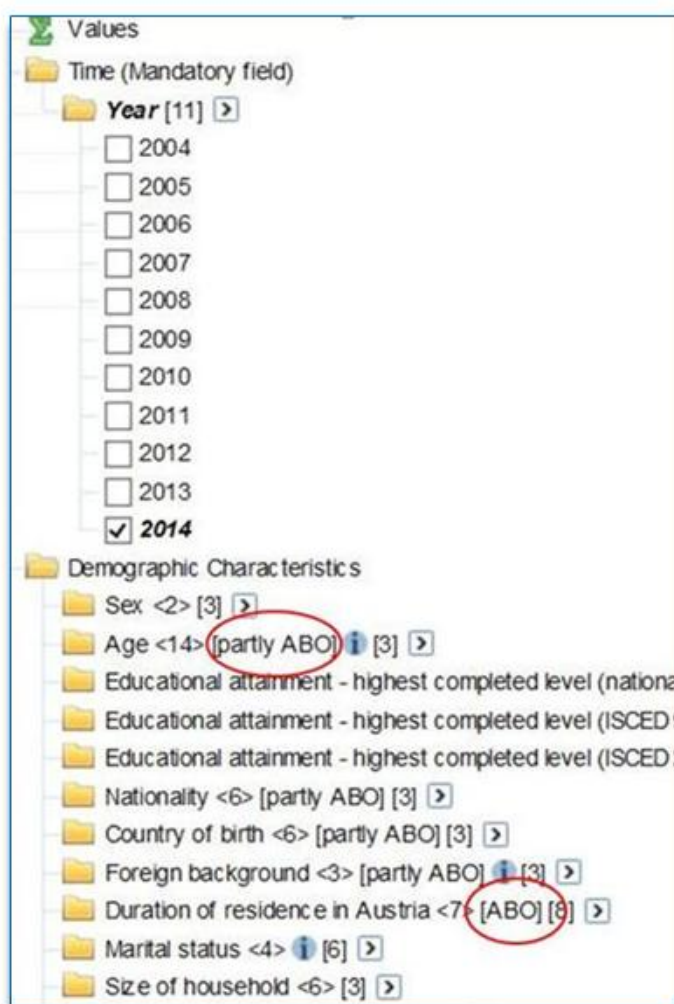

You just have to do the following **4 Steps**:

1. Subscribe
2. You receive your product keys per mail
3. Register
4. Activate

Now we use **STATcube** instead of Database ISIS. **STATcube** is an up-to-date and customer-friendly application optimized for Windows ® Internet Explorer ™.

Why subscription?

Subscribe to **STATcube** to get access to larger data volumes, to data inaccessible to guest users and to be able to store query tables. It's useful to subscribe if there is data available, only. This is shown by the indication [ABO] next to the table rows. Please see the below screenshot.

[Partly ABO] means/signifies that there are more detailed data available to subscribers

[ABO] means/signifies that data is available to subscribers

It only makes sense to subscribe if data is available. In guest mode table rows containing data are marked by [ABO].
