S: STATISTICS AUSTRIA; methodological explanations: see [www.statistik.at](http://www.statistik.at). - \*) Preliminary values. - G = Confidential. - 1) Base year 2015=100: The PPI data beginning in January 2016 were originally in base year 2015=100 and can be converted to the base year 2010=100 and 2005=100 by using the linking coefficients found on our German website (see table "Verkettungsfaktoren"): base year 2010=100 and 2005=100; In the base year of an index periode the average annual measuring number on 100 is standardised. Since January 2005 STATISTICS AUSTRIA has been changing to an Industrial Producer Price Index exclusively based on primary price data. From 2000 up to 2004 an industrial hybrid index has been calculated, which was based on unit values of production sold and real price information from the wholesale price index and investment goods price index for machinery and transport equipment.
