S: STATISTICS AUSTRIA, Register-based Labour Market Statistics 2018. Compiled on 03 August 2020. For data privacy protection reasons, the statistical disclosure control method of "Target Swapping" has been used on a part of the data. Therefore, in particular for cell values ≤ 5 , no reliable assertions can be made. - Family is defined as a married or cohabiting couple with or without children, or a lone parent with one or more children. Children in the family are deemed to be all biological, step or adopted children who have their usual residence in the household of at least one of the parents, and who live in the household without their own partner and without their own children, irrespective of their age or marital status. Sons and daughters who have already moved out of the parental house are therefore not included. 1) Including registered partnerships. - 2) Represents the average number of children of the respective age group in the family. The average number of all children in the family can differ.
