

Press release: 12.787-085/22

Number of deaths in Austria increased stepwise since the beginning of the year

Vienna, 2022-04-14 – According to preliminary results by Statistics Austria the number of weekly deaths has increased, since calendar week 6 (7 to 13 February 2022, 1 855 deaths), however, not continuously. 1 938 persons died in calendar week 13 of 2022 (28 March to 3 April 2022). This was 9% above the number of calendar week 13 of 2021 (1 778 deaths) and 18% above the five-year average for the same calendar week of the years before the start of the Corona pandemic (2015-2019: 1 646 deaths). In the previous week - just after the peak of the 'Omikron-wave' - weekly deaths had reached their highest number so far since the beginning of the year 2022 (1 979 deaths in calendar week 12).

Further information on [deaths](#) can be found on our website, where an interactive web application – [the Atlas of Deaths](#) – also graphically illustrates the development and regional distribution. Detailed results can be found in Statistics Austria's [open data repository](#).
